

Tenure Reduction Timelines

The following timeline indicates the semester in which the interim and final tenure reviews will take place based on the receipt and approval of a reduction-in-tenure request. A 3-year reduction in tenure is only possible if the request is received by the end of the faculty member's first semester. A 2-year reduction in tenure is only possible if the request is received by the end of the faculty member's third semester. A 1-year reduction in tenure is only possible if the request is received by the end of the faculty member's fourth semester. Also note that the timeline for a 3-Year Reduction and 2-Year Reduction #2 will result in back-to-back interim and final tenure reviews, which will not allow the candidate time between reviews to remedy and improve upon any issues brought up in the interim review.
